05:00 PM	End of Day 5

Course Details –

School of Management have organized the Capability Enhancement Skills Program for their students on the topic Evaluating Scenario and Case Studies.

Scenarios and case studies are examples of active and collaborative teaching techniques that research confirms are effective for the deep learning needed for students to be able to remember and apply concepts once they have finished the course. The point is to increase student interest and involvement, and have them practice application by making choices and receive feedback on them, and refine their understanding of concepts and practice in your discipline.

Course Objectives –

- become familiar with the logics, theory, and uses of within-case and small-N comparative case
- identify different perspectives on and conceptualizations of case study research
- understand the advantages, challenges, and limitations of case study research
- critically analyse case study design based on quality criteria
- examine ethical and political issues involved in doing social science research

Course Outcome –

Students will be able to...

- Understand the value of analysing data from multiple sources.
- Evaluate multiple pieces of data to formulate hypothesis
- Provide concrete examples of abstract concepts, facilitate the development through practice of analytical skills, procedural experience, and decision-making skills through application of course concepts in real life situations.
- Result in deep learning and the appreciation of differing perspectives.
- Result in changed perspectives, increased empathy for others, greater insights into challenges faced by others, and increased civic engagement.
